Data Intake Report

Name: G2M Analysis for Cab Investment
Report date: 14/01/2023
Internship Batch: LISUM17
Data intake by: Felipe Indalecio Crespo
Data storage location: https://github.com/felincre/EDA_Cab_Industry

Tabular data details:

Total number of observations	359.392
Total number of files	
Total number of features	7
Base format of the file	.cvs
Size of the data	20.663 KB

Total number of observations	20
Total number of files	
Total number of features	3
Base format of the file	.cvs
Size of the data	1 KB

Total number of observations	49.171
Total number of files	
Total number of features	4
Base format of the file	.cvs
Size of the data	1.027 KB

Total number of observations	440.098
Total number of files	
Total number of features	14
Base format of the file	.cvs
Size of the data	8.788 KB

Proposed Approach:
- Profits - Demand - Profitability (non profitable travel rate - customer retention)
- Just analyzed outliers in Price Charged because it was a base feature for all our analysis. I kept them because it was exploratory work. For future stage and model, I will analyze the criterion to use for these outliers
